

Yacht Carbon Offset

News Release:

15 July 2014

New Brochure for Yacht Carbon Offset

Yacht Carbon Offset's new brochure is available on the [downloads](#) page at yachtcarbonoffset.com. Please let us know if you would like hardcopies to be posted to you.

Managing Director Mark Robinson said *"With more pictures and fewer words, our aim is to show the benefits of this practical, effective environmental service, and its relevance to today's yacht owners, charterers, their families and their guests."*

The new brochure includes four examples of the green energy projects that are supported through your carbon offset payment, and features six of the leading superyachts that have chosen to work with us. We are always happy to answer any questions, or to prepare an individual proposal for you or your clients."

Yacht Carbon Offset has Lloyds Register Quality Assurance Certification, and enables you to counteract the greenhouse gas impact of your yacht whilst preserving your cruising freedom.

No onboard equipment is needed, and the cost is modest (for example: currently €278 to carbon offset 10,000 litres of fuel, excluding VAT where applicable). For more details, and to take action, contact us or visit www.yachtcarbonoffset.com.
