*Balance your Carbon Footprint...*

A photograph taken from the deck of a yacht, looking back over the stern. The foreground shows the wooden deck with two metal cleats. The middle ground is dominated by the white, foamy wake of the yacht, which splits into two channels. The background is a deep blue sky and sea. The text is overlaid on the lower half of the image.

*Yachting offers freedom to experience the most beautiful places in the world,  
but the power of a luxury yacht brings a corresponding carbon footprint.*

Carbon Offsetting is a pro-active way to balance your greenhouse gas emissions, without restricting your enjoyment. Whether for your own satisfaction, for positive PR, or for the reputation of your yacht, you show leadership in environmental performance.

Greenhouse gas emissions from your yacht's engines are quantified, then balanced by equivalent emissions reductions from independently verified green energy projects. It's pragmatic, it's proportionate, and best of all it's very easy to do!

To Carbon Offset your fuel delivery, a charter, or your season's cruising, just contact us or visit [www.yachtcarbonoffset.com](http://www.yachtcarbonoffset.com) for a quotation. We'll ask for the yacht's identity, the fuel type & quantity and for the name and short message to personalise your Certificate. Our service enables you to:

- Balance the carbon footprint of your yachting knowing that real, verified CO<sub>2</sub>e savings are taking place.
- Buy Offsets quickly and easily, accounting for your VAT status.
- Keep records of your Offsetting through unique, verifiable certificates, with secure online access.
- Know that your emissions are reliably calculated for each marine fuel, by a provider with Lloyds Register Quality Assurance Certification.
